

# MALIK OZTURK

## FRONTEND DEVELOPER

In line with my education life and experiences, I had the opportunity to work with different people, take part in a team, do research, develop and learn how to produce together. As developer who cares about his responsibilities, I want to take the responsibility required by your position. Thank you for reading. You can review my CV for my information.

---

## SKILLS

- NextJS (CSR - SSR - SSG) - React - Redux - Socket - Context - JQuery
- TypeScript - Javascript
- NestJS - Socket - Prisma - Firebase DB
- Styled Components - Module CSS - Tailwind CSS - SCSS

---

## EXPERIENCE

### MID FULL STACK DEVELOPER

Artüssü Technology 2024-present

- I am involved in the development of a live streaming platform.
- On the backend, I use technologies such as NestJS, Prisma, Firebase, Socket, and more to build the necessary services, controllers, and gateways.
- On the frontend, I work with technologies like Next.js, TypeScript, RTK Query, and others to integrate the services I develop and create frontend designs.

### MID FRONTEND DEVELOPER

Wingie Enuygun Group 2023-2024 July

- I've had rotation to the UI Transformation Team from the flight team. I've been part of a team whom build design system using by all other teams, had a chance to work cross team.
- Endesign, the Enuygun Design System, is a design-system project that includes common components used in all other projects. In this project, I took part in tasks such as component writing and bug fixing. We shared the needs of all projects and wrote components suitable for everyone.
- I took part in the project of developing Wingie and Enuygun homepages from scratch. Here we developed the project with NextJs, Typescript, and Endesign.
- I took part in the development process of the Web Reissue project from scratch using NextJs, TypeScript, and styled components.

### JUNIOR FRONTEND DEVELOPER

Wingie Enuygun Group 2022-2023

- I worked on the front end of the Speed Expansion project, where market-language-domain parameters were combined in the flight ticket project, and I completely changed the infrastructure of the entire project.
- I took part in product development and the transformation side of the flight ticket project. I transferred the old JQuery and Twig codes to component-based React code and wrote the new features in the new code-based in the same way. I took part in larger developments that affected the entire project code.
- I made valuable improvements for SEO and Lighthouse performance optimization. I contributed to Enuygun.com's Lighthouse scores being higher than those of its competitors.
- I took part in writing the search page from scratch using React and Redux.

### ASSISTANT FRONT END DEVELOPER

Wingie Enuygun Group 2021-2022

- I took part in developing new features and fixing live problems within the projects of Flight Ticket, Gift Card, and Transfer Card Points. In general, I developed the project using JQuery, Twig, and CSS technologies. I was involved in tasks such as communicating with the backend with Axios, using translation files, monitoring error situations encountered by users with Sentry, and finding and solving problems.

---

## EDUCATION

ISTANBUL TOPKAPI UNIVERSITY

Computer Programming 2022-2024 July
